

## APPLY ANIMAL ANATOMY AND PHYSIOLOGY

**UNIT CODE: 0511 551 06A**

**TVET CDACC UNIT CODE: AGR/CU/AP/CC/02/5/MA**

### UNIT DESCRIPTION

This unit describes knowledge, skills and attitudes required to apply animal anatomy and physiology. It involves carrying out animal classification, applying morphology and physiology in animal production

### ELEMENTS AND PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
These describe the key outcomes which make up workplace function.	These are assessable statements which specify the required level of performance for each of the elements. <i><b>Bold and italicized terms are elaborated in the Range.</b></i>
1. Classify farm animals	1.1 <i><b>Mammals</b></i> are classified based on taxonomic principles of classification 1.2 <i><b>Aves</b></i> are classified based on taxonomic principles of classification 1.3 <i><b>Pisces</b></i> are classified based on taxonomic principles of classification 1.4 <i><b>Reptiles</b></i> are classified based on taxonomic principles of classification 1.5 <i><b>Amphibians</b></i> are classified based on taxonomic principles of classification 1.6 <i><b>Arthropods</b></i> are classified based on taxonomic principles of classification
2. Apply morphology in animal production	2.1 External features of animals are identified and illustrated based on animal classification 2.2 <i><b>Animal anatomical structures</b></i> are identified and illustrated based on animal classification 2.3 Relationship between animal structures is illustrated based on physiological functions
3. Apply animal	3.1 <i><b>Animal organ systems</b></i> are identified and illustrated based on

physiological functions	<p>animal morphology</p> <p>3.2 <i>Animal physiological processes</i> are identified and illustrated based on animal morphology</p> <p>3.3 3.3 Adaptations of <i>Animal body organs</i> are identified and illustrated based on animal morphology</p>
-------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## RANGE OF VARIABLES

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

RANGE	VARIABLE
1. Mammals may include but not limited to:	<ul style="list-style-type: none"> <li>• Cattle</li> <li>• Rabbits</li> <li>• Sheep</li> <li>• Goats</li> <li>• Donkeys</li> <li>• Camel</li> <li>• Horses</li> </ul>
2. Aves may include but not limited to:	<ul style="list-style-type: none"> <li>• Chicken</li> <li>• Ducks</li> <li>• Guinea fowl</li> <li>• Geese</li> <li>• Turkey</li> </ul>
3. Pisces may include but not limited to:	<ul style="list-style-type: none"> <li>• Tilapia</li> <li>• Nile perch</li> <li>• Cat fish</li> <li>• Mudfish</li> <li>• Salmon fish</li> </ul>
4. Reptiles may include but not limited to:	<ul style="list-style-type: none"> <li>• Crocodile</li> <li>• Turtles</li> <li>• Lizards</li> </ul>

RANGE	VARIABLE
	<ul style="list-style-type: none"> <li>• Tortoise</li> <li>• Snake</li> </ul>
5. Amphibians may include but not limited to:	<ul style="list-style-type: none"> <li>• Frogs</li> <li>• Toad</li> <li>• Newts</li> <li>• Salamander</li> </ul>
6. Arthropods may include but not limited to:	<ul style="list-style-type: none"> <li>• Tick</li> <li>• Spider</li> <li>• Obsters,</li> <li>• Crabs</li> <li>• Mites</li> <li>• Centipedes</li> <li>• Millipedes</li> </ul>
7. Animal anatomical structures may include but not limited to:	<ul style="list-style-type: none"> <li>• Vertebral column</li> <li>• Skull</li> <li>• Rib</li> <li>• Forelimb</li> <li>• Hind limb</li> <li>• Pectoral girdle</li> <li>• Pelvic girdle</li> </ul>
8. Animal organ systems may include but not limited to:	<ul style="list-style-type: none"> <li>• Circulatory system</li> <li>• Digestive system</li> <li>• Reproductive system</li> <li>• Respiratory system</li> <li>• Excretory system</li> <li>• Nervous system</li> <li>• Lymphatic system</li> <li>• Cardiovascular system</li> <li>• Musculoskeletal system</li> </ul>
9. Animal physiological processes may include but	<ul style="list-style-type: none"> <li>• Respiration</li> <li>• Thermoregulation</li> </ul>

RANGE	VARIABLE
not limited to:	<ul style="list-style-type: none"> <li>• Osmoregulation</li> </ul>
10. Animal body organs may include but not limited to:	<ul style="list-style-type: none"> <li>• Heart</li> <li>• Lungs</li> <li>• Kidney</li> <li>• Skin</li> <li>• Liver</li> <li>• Pancreas</li> </ul>

## REQUIRED KNOWLEDGE AND SKILLS

This section describes the skills and knowledge required for this unit of competency.

### Required knowledge

The individual needs to demonstrate the following knowledge:

- Animal anatomy and morphology
- Animal physiological functions
- Animal classification

easyvet.com

### Required Skills

The individual needs to demonstrate the following skills:

- Drawing
- Decision Making
- Critical thinking
- Communication
- Organizational
- Assertiveness
- Responsibility

## EVIDENCE GUIDE

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical aspects of competency	<p>Assessment requires evidence that the candidate:</p> <p>1.1 Classified animals</p> <p>1.2 Identified and illustrated animal anatomy</p> <p>1.3 Identified and illustrated animal organ systems</p> <p>1.4 Identified and illustrated animal physiological processes</p> <p>1.5 Illustrated how body organs are adapted to perform physiological processes</p>
2. Resource implication	<p>The following resources should be provided:</p> <p>2.1 Access to relevant workplace where assessment can take place.</p> <p>2.2 Appropriately simulated environment where assessment can take place</p> <p>2.3 Material relevant to the proposed assessment activities or tasks</p>
3. Method of assessment	<p>Competency in this unit may be assessed through:</p> <p>2.1 Practical</p> <p>2.2 Projects</p> <p>2.3 Written tests</p> <p>2.4 Questionnaires</p> <p>2.5 Oral questioning</p>
4. Context of assessment	<p>4.1 Competency elements must be assessed in a safe working environment</p> <p>4.2 Assessment may be conducted in a workplace or simulated environment</p>
5. Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>
