

## MANAGE DAIRY CATTLE

**UNIT CODE:** 0811 551 16A

**TVET CDACC UNIT CODE:** AGR/OS/AP/CR/02/4/MA

### UNIT DESCRIPTION

This unit specifies competencies required to manage dairy cattle which involves construction dairy cattle structures, feeding of dairy cattle, breeding of dairy cattle, managing of dairy calf, production of clean milk, Performing dairy cattle routine management practices and marketing of dairy products

### ELEMENTS AND PERFORMANCE CRITERIA

ELEMENT	PERFORMANCE CRITERIA
These describe the key outcomes which make up workplace function.	These are assessable statements which specify the required level of performance for each of the elements. <b><i>Bold and italicized terms are elaborated in the Range.</i></b>
1. Construct dairy cattle structures	1.1 Tools, equipment and materials are assembled as per work requirements 1.2 Site of <b><i>dairy cattle structures</i></b> is selected based on LPM 1.3 Dairy cattle structures are designed according to Livestock Production Manual (LPM) 1.4 Dairy cattle structures are constructed based on livestock production manual 1.5 Dairy cattle structures are maintained as per workplace procedures 1.6 Maintenance records are kept as per workplace requirements 1.7 Waste is managed according to environmental protection regulations
2. Feed dairy cattle	2.1 Tools, equipment and materials are assembled as per work requirements 2.2 <b><i>Dairy cattle feeds</i></b> are identified as per the nutritional requirements 2.3 Dairy cattle are grouped based on their nutritional requirements 2.4 Dairy cattle feeding regime is determined based on LPM

	<p>2.5 Dairy cattle are fed based on their nutritional requirements in accordance with LPM</p> <p>2.6 Feed intake is evaluated as per the LPM</p> <p>2.7 Feed conversion efficiency is evaluated based on productivity</p> <p>2.8 Dairy cattle feeding record is generated as per the workplace procedures</p> <p>2.9 Waste is managed according to environmental protection regulations</p>
3. Breed dairy cattle	<p>3.1 Breeding management tools, equipment and materials are assembled in accordance with LPM</p> <p>3.2 <b>Dairy Cattle breeds</b> are identified based on LPM</p> <p>3.3 Dairy Cattle breeds are selected based on traits of economic importance and farmer requirements</p> <p>3.4 Dairy cattle on heat are detected based on LPM</p> <p>3.5 Flushing is carried out as per LPM</p> <p>3.6 Service is performed based on the <b>breeding method and technologies</b> as per the LPM</p> <p>3.7 Gestation is managed as per the LPM</p> <p>3.8 In-calf dairy cows are cared for based on the LPM</p> <p>3.9 Steaming-up is carried out based on LPM</p> <p>3.10 Parturition Breeding records are prepared as per work procedures</p>
4. Manage dairy calf	<p>4.1 Calf management tools, equipment and materials are assembled as per the LPM</p> <p>4.2 Calf pens are prepared as per LPM</p> <p>4.3 Calf is handled at birth as per LPM</p> <p>4.4 Calf is fed colostrum according to the LPM</p> <p>4.5 Orphaned calves are fostered according to LPM</p> <p>4.6 Artificial colostrum is prepared as per LPM</p> <p>4.7 Calf is identified using suitable method in accordance with LPM, animal welfare regulations and work place policy</p> <p>4.8 Calf is housed based on production system, prevailing climatic conditions and age within LPM standards</p>

	<p>4.9 Calf is introduced to roughage feeding in accordance with LPM</p> <p>4.10 Calf is disbudded and extra mammary teats removed in accordance with animal welfare regulations and work place policy</p> <p>4.11 Calf is weighed in accordance with LPM instructions and work place policy</p> <p>4.12 Calf growth rate is monitored as per LPM</p> <p>4.13 Calf is weaned in accordance with the LPM</p> <p>4.14 Waste is managed and disposed based on environmental protection regulations</p>
5. Produce clean milk	<p>5.1 <b>Milking materials and equipment</b> are assembled based on the milking technique selected</p> <p>5.2 Milking cows are assembled in accordance with the LPM</p> <p>5.3 Milking cow is restrained in accordance with the LPM</p> <p>5.4 Udder is cleaned and pre-dipped according to LPM</p> <p>5.5 <b>Mastitis test</b> is carried out based LPM</p> <p>5.6 Milk let down is stimulated based on selected <b>milking technique</b></p> <p>5.7 Milking is carried out based on Essentials of Clean Milk Production Standard.</p> <p>5.8 Udder quarters are disinfected as per the LPM</p> <p>5.9 Milked cow is released as per workplace procedures</p> <p>5.10 Milk is sieved and weighed according to the workplace procedures</p> <p>5.11 Milk is stored and cooled in accordance with LPM</p> <p>5.12 Milk production record is maintained based on the workplace procedures</p> <p>5.13 Milking equipment are cleaned as per workplace procedures</p> <p>5.14 Milking parlour is cleaned as per workplace procedures</p> <p>5.15 Re-usable materials are stored as per manufactures instruction and workplace policy</p> <p>5.16 Waste is managed and disposed with due regard to</p>

	environment protection regulations
6. Perform dairy cattle routine management practices	<p>6.1 Dairy <b>Cattle identification method</b> is selected based on GAPs</p> <p>6.2 Cattle is dehorned or disbudded based on GAPs</p> <p>6.3 Cattle overgrown hooves are trimmed based on GAPs</p> <p>6.4 Dairy cattle are culled based on workplace policy</p> <p>6.5 Internal and external parasites are controlled based on LPM and GAPs</p> <p>6.6 Vaccination is performed as per workplace policy, manufacturer's instructions and LPM</p> <p>6.7 Cattle isolation and quarantine is carried out to control notifiable diseases based on GAPs</p> <p>6.8 Dairy cattle are provided with clean water ad-libitum as per LPM</p>
7. Market dairy cattle products	<p>7.1 Market survey is conducted based on Standard Survey guidelines</p> <p>7.2 <b>Dairy Cattle products</b> are sold based on market demands</p> <p>7.3 Dairy Cattle is transported to the market based on Animal Welfare Act,</p> <p>7.4 Marketing records are maintained based on the organization's record management guidelines</p>

## RANGE OF VARIABLES

This section provides work environments and conditions to which the performance criteria apply. It allows for different work environments and situations that will affect performance.

RANGE	VARIABLE
1. Dairy cattle structures may include but not limited to:	<ul style="list-style-type: none"> <li>• Crushes</li> <li>• Milking parlour</li> <li>• Barn</li> <li>• Feeding facility</li> <li>• Cattle shed</li> <li>• Cattle dips</li> </ul>

<b>RANGE</b>	<b>VARIABLE</b>
	<ul style="list-style-type: none"> <li>• Feed storage facility</li> <li>• Farm office</li> </ul>
2. Dairy cattle feeds may include but not limited to:	<ul style="list-style-type: none"> <li>• Carbohydrates</li> <li>• Proteins</li> <li>• Vitamins</li> <li>• Minerals</li> <li>• Fats/ lipids</li> <li>• Water</li> </ul>
3. Dairy Cattle breeds method may include but not limited to:	<ul style="list-style-type: none"> <li>• Friesian</li> <li>• Aryshire</li> <li>• Sahiwal</li> <li>• Jersey</li> <li>• Brown Swiss</li> </ul>
4. Breeding method and technologies may include but not limited to:	<ul style="list-style-type: none"> <li>• Artificial insemination</li> <li>• Natural method</li> <li>• Cross breeding</li> <li>• Pure breeding</li> <li>• Inbreeding</li> <li>• Embryo transfer</li> <li>• Surrogate</li> <li>• Signs of heat</li> <li>• Estrus synchronization</li> </ul>
5. Milking materials and equipment may include but not limited to:	<ul style="list-style-type: none"> <li>• Animal Restraint</li> <li>• Cleaning</li> <li>• Cups</li> <li>• Herd Test Buckets</li> <li>• Thermometer</li> <li>• Separator</li> </ul>
6. Mastitis test may include but not limited to:	<ul style="list-style-type: none"> <li>• CMT</li> <li>• Strip cup</li> </ul>

<b>RANGE</b>	<b>VARIABLE</b>
7. Milking technique may include but not limited to:	<ul style="list-style-type: none"> <li>• Hand milking</li> <li>• Milking machine</li> </ul>
8. Cattle identification method may include but not limited to:	<ul style="list-style-type: none"> <li>• Ear tagging</li> <li>• Ear notching</li> <li>• Branding</li> <li>• Neck chains</li> <li>• Straps with numbers</li> <li>• Ear tattooing</li> </ul>
9. Dairy Cattle products may include but not limited to:	<ul style="list-style-type: none"> <li>• Milk</li> <li>• Hides</li> <li>• Hooves</li> <li>• Cream.</li> <li>• Butter.</li> <li>• Fermented.</li> <li>• Yogurt.</li> <li>• Cheese</li> </ul>

## **REQUIRED SKILLS AND KNOWLEDGE**

This section describes the skills and knowledge required for this unit of competency.

### **Required Skills**

The individual needs to demonstrate the following skills:

- Communication
- Analytical
- Evaluation
- Management
- Problem solving
- Time management
- Data collection
- Numeracy

- Observation
- Negotiation
- Digital literacy
- Equipment calibration

### Required knowledge

The individual needs to demonstrate knowledge of:

- Principles of animal production
- Cattle selection and breeding
- Cattle nutrition
- Parasite and disease management in cattle
- Cattle value added products
- Cattle routine management practices
- Cattle structures
- Cattle production records

### EVIDENCE GUIDE

This provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge and range.

1. Critical aspects of competency	6. Assessment requires evidence that the candidate: <ul style="list-style-type: none"> <li>1.1 Selected site of dairy cattle structures based on LPM</li> <li>1.2 Kept maintenance records as per workplace requirements</li> <li>1.3 Grouped dairy cattle based on their nutritional requirements</li> <li>1.4 Determined dairy cattle feeding regime based on LPM</li> <li>1.5 Fed dairy cattle based on their nutritional requirements in accordance with LPM</li> <li>1.6 Selected dairy cattle breeds based on traits of economic importance and farmer requirements</li> <li>1.7 Cleaned udder and pre-dipped according to LPM</li> <li>1.8 Carried mastitis test out based LPM</li> <li>1.9 Stimulated milk let down based on selected milking technique</li> <li>1.10 Carried out milking based on Essentials of Clean Milk</li> </ul>
-----------------------------------	--

	<p>Production Standard.</p> <p>1.11 Disinfected udder quarters as per the LPM</p> <p>1.12 Carried out cattle isolation and quarantine is to control notifiable diseases based on GAPs</p> <p>1.13 Sold dairy Cattle products are based on market demands</p> <p>1.14 Managed waste is with due regard to environment protection regulations</p>
2. Resource implication	<p>The following resources should be provided:</p> <p>2.1 Access to relevant workplace where assessment can take place</p> <p>2.2 Appropriately simulated environment where assessment can take place</p> <p>2.3 Materials relevant to the proposed assessment activity or tasks</p>
3. Method of assessment	<p>Competency in this unit may be assessed through:</p> <p>3.1 Written tests</p> <p>3.2 Questionnaires</p> <p>3.3 Oral questioning</p> <p>3.4 Projects</p> <p>3.5 Observation</p>
4. Context of assessment	<p>Competency elements may be assessed</p> <p>4.1 workplace</p> <p>4.2 simulated environment</p>
5. Guidance information for assessment	<p>Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.</p>
